

CloudCare Medical – Risk Assessment

Asset	Threat	Vulnerability	Risk Level	Recommended Control
Patient Database	Data Breach	Weak passwords	High	Multi-factor authentication
Employee Laptops	Malware Infection	Outdated antivirus	Medium	Endpoint protection software
Email System	Phishing Attack	Lack of employee awareness	High	Security awareness training
Microsoft 365 Accounts	Account Compromise	Weak password policy	High	Strong password enforcement
Shared Drives	Unauthorised Access	Excessive permissions	Medium	Access control review
Remote Access VPN	Brute Force Attack	No MFA enabled	High	MFA implementation
HR Records	Data Leakage	Poor access restrictions	Medium	Role-based access control
Internal Network	Ransomware	Unpatched systems	High	Regular security updates
Backup Servers	Data Loss	No backup testing	Medium	Backup recovery testing
Cloud Storage System	Misconfiguration	Incorrect permissions	High	Security configuration reviews
