

CloudCare Medical – Company Overview

Company Description:

CloudCare Medical is a medium-sized healthcare organisation that provides digital patient management services, appointment scheduling, and remote healthcare support. The company stores sensitive patient information and uses cloud-based systems to support daily operations.

Employees:

The organisation has approximately 50 employees including healthcare staff, administrative personnel, IT support, and management teams.

Technology Environment:

CloudCare Medical uses Microsoft 365 for communication and collaboration, cloud storage systems for patient data, employee laptops, email services, and remote access technologies to support hybrid working arrangements.

Sensitive Data:

The organisation handles confidential patient records, employee information, financial data, and internal operational documents which require strong security and access controls.
